

The Special Session Call for Papers:

Topic: Economic and Social Effects of Demographic Trends (SS-ESED)

Session Chair:

Assoc. Prof. Ana Štambuk, PhD

Univ. of Rijeka, Faculty of Economics, Dept. of Statistics, Rijeka, Croatia

e-mail: ana.stambuk@efri.hr

Special Session Abstract:

Economies around the globe nowadays face demographic challenges. Demographic challenges mostly affect not only the labor market but other macroeconomic segments and society in general as well. The aim of this session is to get insight into the wide spectre of impacts that current demographic trends cause and focus on their interdependence. Therefore, the focus of this session is directed to the application of qualitative and quantitative methods for obtaining new information on the consequences of demographic changes on various economies and countries in general. A deeper investigation using regression modelling of relations of selected demographic variables and economic development indicators over different countries is especially welcome.

Expected scientific and professional contribution from the speakers includes qualitative and quantitative research addressing demographic issues and respective data from various countries. Conclusions of this session should help the researchers in estimating, forecasting and modelling impact of current demographic trends in their respective countries.

The novelties in demographic research of economic and social effects of demographic changes in a wider sense presented by both academic and official statistics researchers are welcome.

Contributions to demographic statistics teaching resulted from the teachers' efforts to teach their students how to discover relations of economic and social variables with demographic changes and trends, using graphical and numerical methods, with qualitative explanations are welcome, too.

Special Session Keywords:

- Demographic changes impact on economic development indicators
- Modelling with demographic variables
- Demographic statistics research
- Demographic statistics teaching methods
- Demographic statistics education
- Population aging
- Population migration
